EDUCATION

Computer Science (BSc) – *Toronto Metropolitan University, Toronto, ON* Sep 2022 – Jun 2026 (expected)

- **Relevant Coursework:** Computer Science 2 | Intro to UNIX and C | Computer Organization I & II | Operating Systems

Software Engineering – *Addis Ababa Institute of Technology* Sep 2018 – Nov 2021

- **Relevant Coursework:** Data Structures and Algorithms | Fundamentals of Databases | Fundamentals of Computer Science and Programming | Mobile Programming

TECHNICAL SKILLS

- *HTML* | *CSS* | *TypeScript* | *JavaScript* | *Java* | *C#* | *C* | *React* | *Node.js* | *Angular* | *Spring-Boot* | *GCP* | *Python* | *Flask* | *Django* | *Flutter* | *MongoDB* | *MySQL* | *PostgreSQL*

EXPERIENCE

Software Developer Intern – *The Home Depot Canada. Corporate Office* May 2025 – Aug 2025

- Enhanced backend service capabilities in a microservices architecture by introducing configurable module flags and extending **SQL** schema metadata to support scalable business logic.
- Contributed to the development of enterprise Angular applications, building reactive, state-managed UI components using **TypeScript**, **RxJS**, and **SCSS**, while improving performance and maintainability.
- Refactored legacy UI code by replacing outdated, minified class libraries with modern, semantic styles and internal design system classes, resulting in cleaner code and a more consistent user interface.
- Collaborated cross-functionally with design, QA, and backend teams in an Agile environment to deliver customer-facing features and support **CI/CD** delivery pipelines.

Sales Associate – *The Home Depot Canada. Pickering* Nov 2022 – May 2025

- Leveraged analytical skills to identify buying patterns among Home Depot clients, enabling personalized and tailored recommendations for customers.

PROJECTS

Unity Game project using C# Aug 2021 – Sep 2021

- Led a team of 5 programmers in developing a 2.5D platformer game on **Unity** by writing and modularizing **C#** game scripts, resulting in a seamlessly integrated and engaging gaming experience with positive user feedback.
- Assigned tasks to each group member and monitored important deadlines with caution, resulting in an on-time submission of the project.
- Quickly identified project issues and led virtual team discussions to resolve them, resulting in a stable codebase and a perfect project score.

Individual Projects

- Published two custom VS Code themes using **JSON**, enhancing developer experience with optimized color schemes and syntax highlighting, totalling over 200 downloads.
- Created and launched an interactive website with details about the chemical compound D-Mannitol, integrating **HTML** and **JavaScript**, while using **Tailwind CSS** to create a responsive layout, resulting in an enhanced user experience.
- Developed a well-formatted and grid-oriented Android image gallery application using the **Flutter** framework by **Google**, resulting in great user feedback.

VOLUNTEER / EXTRACURRICULAR ACTIVITIES

Computer technician – *Electronic Recycling Association (ERA.ca)* Summer 2022 & Summer 2023

- Responsible for the stripping, testing and recycling of different electronic devices while also going around Toronto to collect e-waste, contributing to a greener city.
